

Automatic AI document recognition, keywording and storage by PIA (PaperOffice Intelligent Automatization)

Thanks to PIA Automate and AutoFill, your documents can be automatically recognized, read out, tagged and stored.

Contact and address management / AI-based contact recognition and linking

With the integrated network-compatible contact and address management, contacts can be linked to your documents.

Thanks to the recognition technology from PIA AutoContact, contact information is even read out of the document and linked to created contacts.

Workflow management and task assignment (PaperOffice Control)

Automate your entire work processes through work instructions and due date monitoring, create entire work processes digitally and issue digital approval to monitor all your processes.

Digital receipt capture

Acquisition, analysis, recognition and filing in a matter of seconds - fully automated.

PaperOffice is not only one of the most powerful DMS in that it records all document types, but is also specially optimized for receipt capture.

API integration and interfaces

Integrate PaperOffice without a developer in every application and software and access PaperOffice via script.

Simply use the command line to control PaperOffice remotely or create a JSON file in the API directory with control commands.

NAS connection (e.g. Synology & QNAP)

Due to the architecture of PaperOffice, the combination with a NAS is the perfect solution for a complete **document management** in the digital office.

Stamp function

Put stamps on your documents. Stamps can be provided with user rights, trigger workflows and carry out further actions.

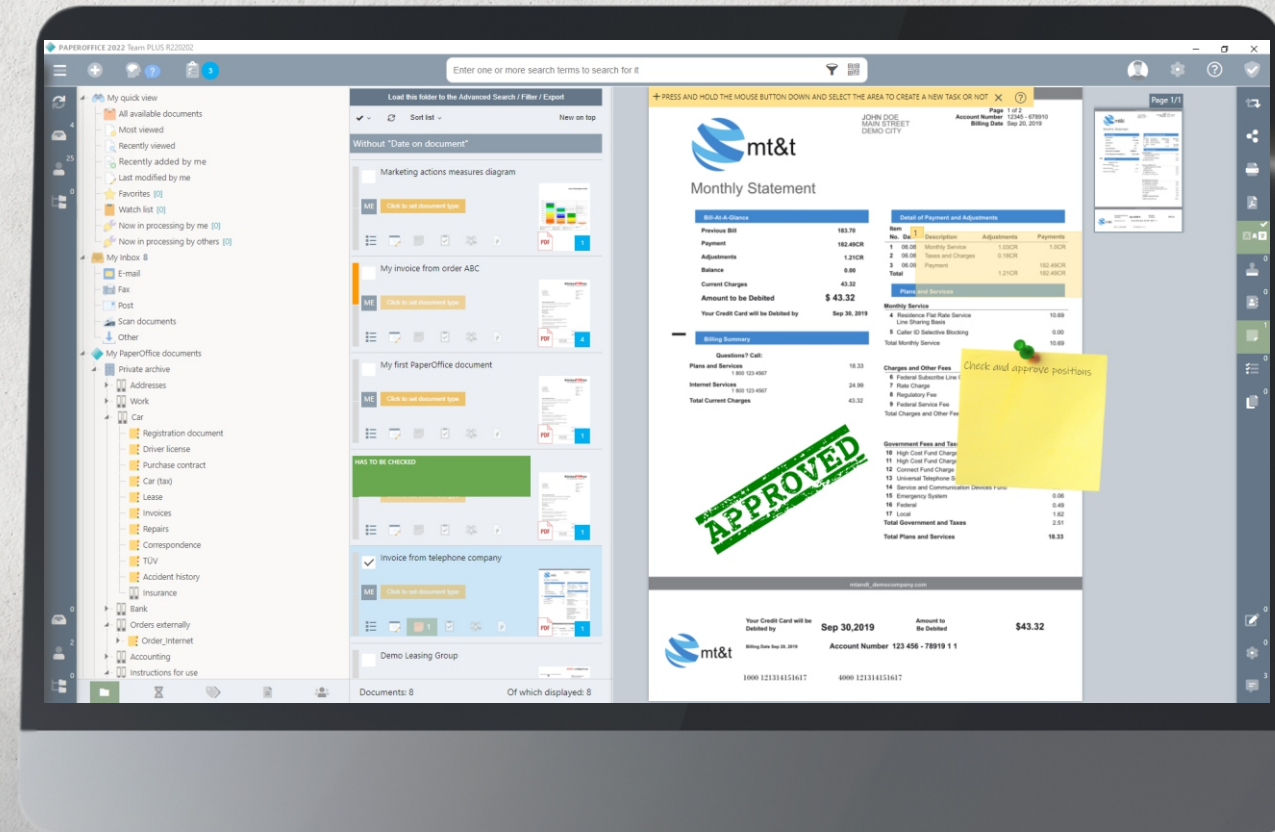

Dynamic variables can be added to stamps and even email notifications are automatically sent upon use.

GOBD & GDPR ready

Efficient and AI-based document archiving, file management, contract management and document management for SMEs through to large companies.

World's best OCR text recognition, live keyword search and SQL based revision-proof data storage -

You are guaranteed to find any document in seconds.

Why choose PaperOffice?

You won't find anything like it on the market. Benefit from our experience and trust in PaperOffice DMS: digitization of paper documents, audit-proof e-mail archiving, additional advanced search and document management - everything is integrated in PaperOffice and thus enables the perfect conversion to a paperless office.

All documents in a central database

All documents and information are encrypted in a central MySQL database stored locally or e.g. directly on your NAS device, which is automatically set up by PaperOffice.

No cloud solution and no internet connection required

Data protection in perfection: PaperOffice document management system is a locally installed application, not a cloud solution and does not require an internet connection.

Tax office compliant

PaperOffice enables revision-proof versioning and is tax office-compliant for electronic archiving.

PAPEROFFICE DMS DIGITALIZATION AND AUTOMATION FOR YOUR BUSINESS

Archive, manage and find documents with automatic AI-based document recognition.

PaperOffice DMS: The document management system
Goodbye paper chaos, welcome digital office.

www.paperoffice.com

What is PaperOffice DMS?

PaperOffice is the ultimate document management solution for your success: Manage your documents in a unique way and access all kinds of information at lightning speed. Everything is available everywhere and your data remains securely encrypted in your PaperOffice.

AI-based automatic filing

PaperOffice recognizes all added documents on the basis of AI, learns them using visual features and keywords and saves them fully automatically.

GOBD and GDPR-compliant thanks to revision-proof SQL database

PaperOffice has tested and tax-compliant document storage and complies with all European laws and guidelines for the collection, storage and provision of documents.

Find everything again in a flash

There are no further requests: Clear display of search results with preview images, the most important information and direct display of the text passage of the document brings the **best full-text search of all time.**
